

Amendments to the Claims:

1. (currently amended) A supporting structure, comprising:

an elongate body member made of flexible material and being
bendable and foldable [with unlimited angle] into a plurality of shapes while retains the
bent shape until subsequently reposition;

an exterior covering member, directly formed on the elongate body member by an
injection mold process, wherein the exterior covering member exposes two ends of the
elongate member and has a bellow configuration, wherein the exterior covering member
has a diameter gradually reduced from two ends to a center thereof;

a suction device, connected to one of the exposed end of the elongate body member; and
a holding device, connected to the other exposed end of the elongate body member.

2. (original) The structure according to Claim 1, wherein the flexible material includes aluminum
material.

3. (original) The structure according to Claim 1, wherein the exterior covering member includes
soft plastic material.

4. (canceled).

5. (original) The structure according to Claim 1, wherein the elongate body member has a
roughened exterior surface.

6. (original) The structure according to Claim 1, wherein the suction device includes a suction
disk.
